

Cidara Therapeutics to Present at the 18th Annual Needham Healthcare Conference

April 3, 2019

SAN DIEGO, April 03, 2019 (GLOBE NEWSWIRE) -- Cidara Therapeutics, Inc. (Nasdaq: CDTX), a biotechnology company developing novel anti-infectives including immunotherapies, today announced that Jeffrey Stein, Ph.D., president and chief executive officer of Cidara, is scheduled to present at the 18th Annual Needham Healthcare Conference on Tuesday, April 9, 2019, at 11:20 a.m. EDT (8:20 a.m. PDT) in New York City.

A live audio webcast and replay of the presentation will be available in the Investors section on the company's website at www.cidara.com.

About Cidara Therapeutics

Cidara is a clinical-stage biotechnology company focused on the discovery, development and commercialization of novel anti-infectives that have the potential to transform the standard of care and save or improve patients' lives. Cidara is currently advancing its novel echinocandin antifungal, rezafungin acetate, in a Phase 3 clinical trial, for the treatment of candidemia and invasive candidiasis and continues to discuss with regulatory authorities its plans for the design and the initiation of a second Phase 3 trial in the prophylaxis of invasive fungal infections in patients undergoing allogeneic blood and marrow transplantation. Rezafungin is the only once-weekly product candidate in development for the treatment and prevention of life-threatening invasive fungal infections. Cidara also is leveraging its proprietary Cloudbreak[®] platform to develop antiviral conjugates (AVCs) for serious infections, including further investigation of the high potency and long half-life observed in its AVCs for influenza. The Cloudbreak platform is designed to discover compounds that both directly kill pathogens and direct a patient's immune system to attack and eliminate pathogens. Cidara is headquartered in San Diego, California. For more information, please visit www.cidara.com.

Forward-Looking Statements

Statements contained in this press release regarding matters that are not historical facts are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Because such statements are subject to risks and uncertainties, actual results may differ materially from those expressed or implied by such forward-looking statements. Such statements include, but are not limited to, the potential for rezafungin to successfully treat or prevent invasive fungal infections and represent an improvement over current approaches and Cidara's ability to successfully develop rezafungin. Such statements also include, but are not limited to statements regarding the potential for Cidara's AVCs to treat and prevent influenza. Risks that contribute to the uncertain nature of the forward-looking statements include: the success and timing of Cidara's preclinical studies and clinical trials; regulatory developments in the United States and foreign countries; changes in Cidara's plans to develop and commercialize its product candidates; Cidara's ability to obtain additional financing; Cidara's ability to obtain and maintain intellectual property protection for its product candidates; and the loss of key scientific or management personnel. These and other risks and uncertainties are described more fully in Cidara's Form 10-K most recently filed with the United States Securities and Exchange Commission. All forward-looking statements contained in this press release speak only as of the date on which they were made. Cidara undertakes no obligation to update such statements to reflect events that occur or circumstances that exist after the date on which they were made.
